Mental health care

Workforce training for teens

Financial skills training

Employment opportunities for teens

Bullying/relationship violence prevention

20%

of respondents have had children afraid to attend school/other activities due to **BULLYING**.

Riley County Community Needs Assessment

CHILDREN AND YOUTH FINDINGS

The 2020 Riley County Community Needs Assessment, conducted by Wichita State University Center for Applied Research and Evaluation, included the compilation of selected secondary data, administration of a community survey (n=1,229), key informant interviews, and focus groups with persons who were underrepresented in the survey.

A number of pieces of secondary data indicate that Riley County has higher numbers of residents with children receiving inadequate prenatal care as well as participating in WIC (Special Supplemental Nutrition Program for Women, Infants, and Children) and SNAP (Supplemental Nutrition Assistance Program). These numbers are likely a by-product of the elevated rates of poverty and issues with affordable/accessible healthcare in the community. In the survey, 34.2% of respondents identified as parents, with 3.3% indicating they are custodial grandparents. Most respondents reported being relatively satisfied with services and resources for children and youth in the community except related to child care affordability and options.

Selected data from secondary sources

Children and Youth	Riley County	Kansas	Source
Percent of births with inadequate prenatal care, 2017	21.9%	16.6%	Kids Count via Kansas Department of Health and Environment
